INTEGRITY

I care deeply about doing the right thing even if no one is looking

EXCELLENCE

I dedicate myself and encourage others to work with excellence. Excellent work is hard work plus ultra.

EMPATHY

We live in an ecosystem of people. People are more than just their skills.

I am a tech enthusiast with a passion for excellent work regardless of position, technology, or environment!

A LITTLE ABOUT ME!

I have a strong *passion* to output *excellence* in all that I do. I am a firm believer in *hard work* no matter what my task is. I don't just want to "add value". I want to *"multiply value"*.

I spent most of my time at work, with my family, or at church. Why do I bring this up? Because I work the same way I live - with a 127% of my life and vigor. I love learning, and I can do this quickly.

I play guitar, piano, and bass. My two favorite animals are ducks and rhinos.

SKILLS AND STUFF

VanillaJS, ReactJS, NodeJS, KOA/Express, MongoDB, HTML,CSS/SCSS, Redis.

Whatever you want me to learn, I will do it.

HISTORY HIGHLIGHTS

Developed custom JS Framework to use in legacy application including custom lifecycle rendering management, state management, data stores, service lifecycles, and more for an international enterprise app *(Vectorform)*

Created dockerization of enterprise application development for developer ease. This sped the time from original process up to 10 times faster *(Vectorform)*

Updated legacy system to start migrating to modern build tooling using webpack and Babel (next) for modern development *(Vectorform)*

Develop features for a time management and internal HR application using a modular approach to authentication and components *(Vectorform)*

Co-founded the VF-BreadClub <- Ask me about it *(Vectorform)*

Helped lead team standards for git commits, lint rules, code review process, and testing *(Vectorform)*

Helped design, develop, and deliver 6 production modules, 2 test modules and 18 microservice applications. Led the front end team and contributed to server side architecture, development, and deployment *(Gas Station TV)*

Created various utilities to include a custom JS DiffEngine, ActionEngine, Notification Emailer, and other various JS Utilities *(Gas Station TV)*

Designed Request API Structure and standards *(Gas Station TV)*

Created POC w/ GraphQL and React to help shift team from Java/Angular to React/Node *(Gas Station TV)*

Helped engineer and develop a web application utilizing MVC architecture and modern approach to web design for a contingent workforce management system *(OpenLogix)*

QUALIFICATION HIGHLIGHTS

Able to accomplish task with little or no supervision, even under tight deadlines

Able to make sound and timely decisions while adapting to situations

Proven excellent attention to detail in multiple environments

Able to make sound and timely decisions while adapting to situations

Provides consistent successful results within many varied work environments

Awarded multiple times for dedication, hard-work, and superior performance to include Navy and Marine Commendation Medal with Combat "V"

Ability to pick up new skills quickly and adapts current skills rapidly
